Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/30/2007 has been entered.

Claim Objections

Claims 6 and 20 is objected to because of the following informalities: Claim 20 is labeled as original and should be properly labeled as withdrawn. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 21 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Wevers (U.S. Patent No. 4,456,006).

Richards discloses a clip that has at least two straight engagement legs provided with gripping surfaces (14), extending parallel to one another including respective distal bridging tips and respective proximal insertion tips as well as a connecting bridge coupled to the distal bridging tips of the two engagement legs that are at least two elongated sections (10,11) extending along side on another. The elongated section extends along a non-linear trajectory and includes one of a depression and a dome (see Fig. 1 below). Also disclosed is that the engagement legs and the connecting bridges are constructed from a biocompatible material (Col. 1, lines 16-19). Furthermore, the two elongated section includes respective bulges that together form a space of separation between elongated sections (see Fig. 1 below).

Response to Arguments

Applicant's arguments with respect to claims 1 and 21 have been considered but are moot in view of the new ground(s) of rejection.
